

## MIRACLE II IMPROVING AGRICULTURE?

Some people have reported that Miracle II Neutralizer has had some amazing results in agriculture, improving crop yields by over 100%, with enhanced produce taste and nutrition without using any fertilizer, chemical or organic. When 2 oz./acre of the neutralizer was added to irrigation water and used in conjunction with a radio-frequency descaling device coupled to a radionics unit containing the resonant frequency of organic fertilizers, the radionics energy levels were the highest ever recorded for any substance. The previous high was held by potential living Aloe Vera extract that measured in at 45,000 units. The radionics energy of the potentiated neutralizer was measured at over one million units! We are talking about 2 oz. Miracle II Neutralizer per acre of irrigation water which is way less than one part per trillion Miracle II Neutralizer in the water.

But that's not all: the run-off water on the other side of the irrigated tract still had over one million radionics energy units after it had serviced the field! The subsequent crop yields were in excess of 200% above average with no fertilizer added prior to or during the growing season as had been done in previous growing seasons that were used for yield comparisons. One can understand a descaling unit unblocking bound nitrates and minerals from the soil, but these synergistic results are unheard of and well beyond descaling abilities. The cost of 2 oz./acre Miracle II Neutralizer is nothing compared to what farmers spend on fertilizer. This is not a fantasy, these are actual test results from a south Texas Mission Valley farm. Miracle II Neutralizer is available in concentrated liquid form or powder for agricultural use by special request. This begs further research by qualified research scientists.

The soaps and neutralizer combination is especially effective for eliminating the toxicity from those who have been exposed to pesticides and herbicides.
